 - Open and scalable
 - Clear roadmap
SEEBURGER already delivers for the strategic platform of all future SAP solutions and will continue to deliver all its solutions for SAP NetWeaver

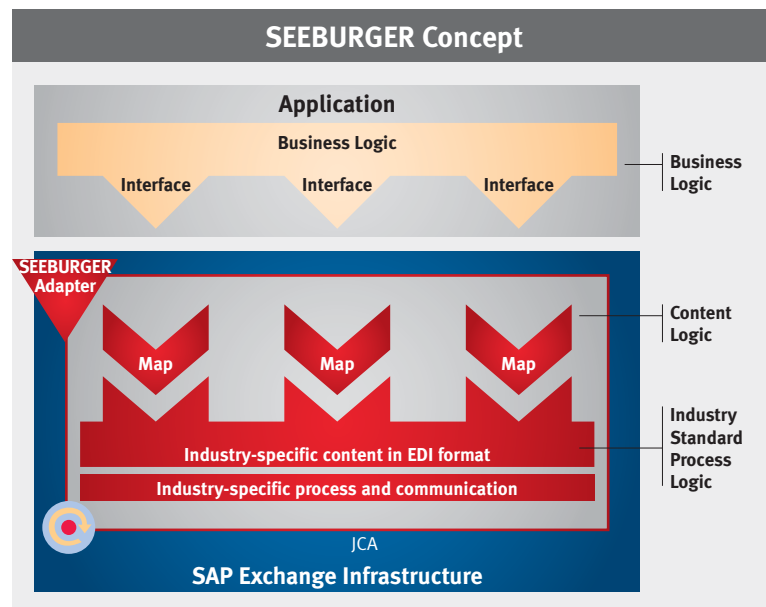

Solutions for SAP NetWeaver™

100% strategy & benefits compatible

Concept and Benefits

SEEBURGER's solutions for SAP NetWeaver provide adapters that:

- Allow integration using an **uniform** platform concept
- Cover internal and **external** integration requirements
- Provide value by availability of **pre-configured integration** solutions:
 - Business content
 - Technology
 - Expertise

The comprehensive integration through SEEBURGER adapters within SAP NetWeaver results in:

- Low TCO by having just one integration platform
- Rapid ROI: Immediate integration through availability of preconfigured solutions improved application proximity using SAP XI:
 - Standardized access to applications during the design and implementation of the integration processes
 - Closer interaction between external content and application logic via SAP XI workflows
 - Application- and solutionfocused business processes
 - Substantially enhanced use of the SEEBURGER EDI/B-to-B technology suite to get the maximum benefit of the modelled business logic

About SEEBURGER

SEEBURGER AG is the only provider to realise by means of a wide range of integration solutions and consulting services almost total inter-company process integration. Its offering ranges from SCM-RFID management and PLM consulting via economic and technical feasibility analyses to efficient technical realisation of business processes in robust continuous operation. At the same time, the technical connection process is independent of existing IT infrastructure and technology. RFID data, paper documents and all electronic data are processed. SEEBURGER Services supplements this by providing outtasking, outsourcing, consulting, rollout, support and the total partner integration programme. In this way SEEBURGER is able to provide all-round customer care and to create the conditions for collaborative commerce. SEEBURGER makes B-to-B integration as easily obtainable as power from a socket. The customer profits from industry expertise and know-how gained from projects with more than 7,000 companies, including Beiersdorf, EnBW, Kraft, Novartis, OBI, Porsche, REWE, Ritter Sport, Siemens, s.Oliver, Varta and Volkswagen. SEEBURGER AG was established in 1986 in Bretten and has 16 branches around the Globe.
